The blue circle symbolizes the **Internet Platform** that stores the members' profiles and contact information.

It also monitors all circulating parcels.

Therefore the platform can also be referred to as the eye that organizes the global parcel flow.

It is the heart of the system.

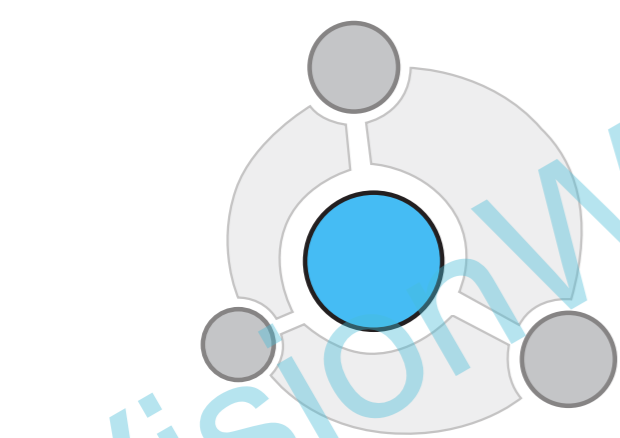

All parcels can easily be identified by collective members because each parcel has its unique **Parcel-ID**.

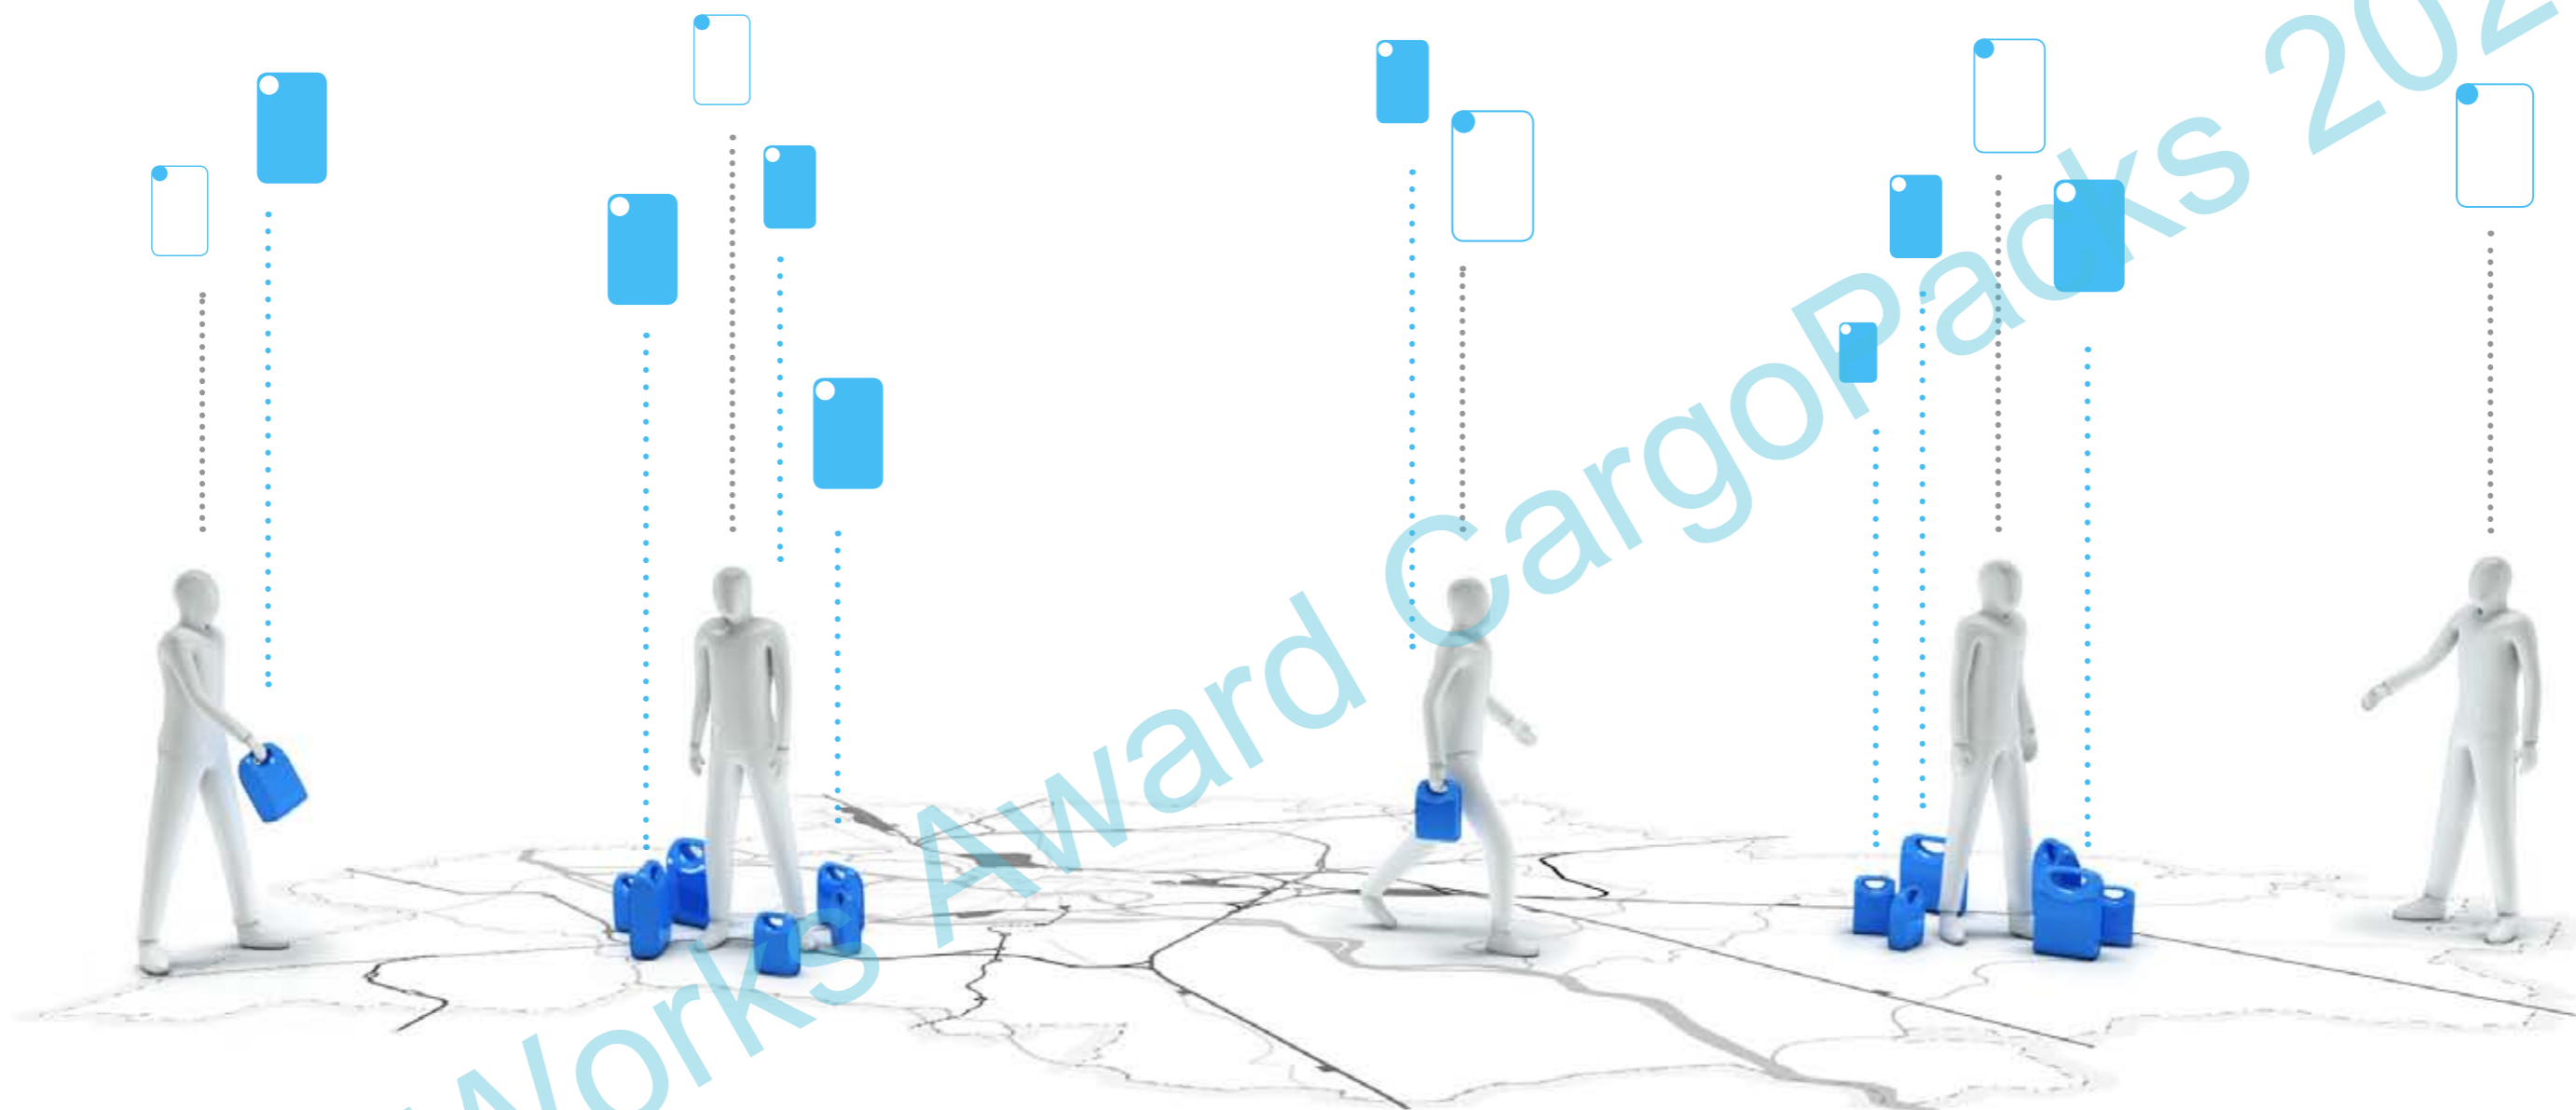

Seamless networking Devices connect the parcel to the online platform.

A **GPS - Sender** allows live tracking.

Theft Protection!
Stealing a parcel is a hard thing to do, since only authorized members will be able to carry it.

The entire shell is a sophisticated **OLED Display** and fingerprint Scanner.
