

Service

This is a very comfortable option to relieve oneself of luggage while still knowing it save and on the right way.

Keep an „i“ on it!

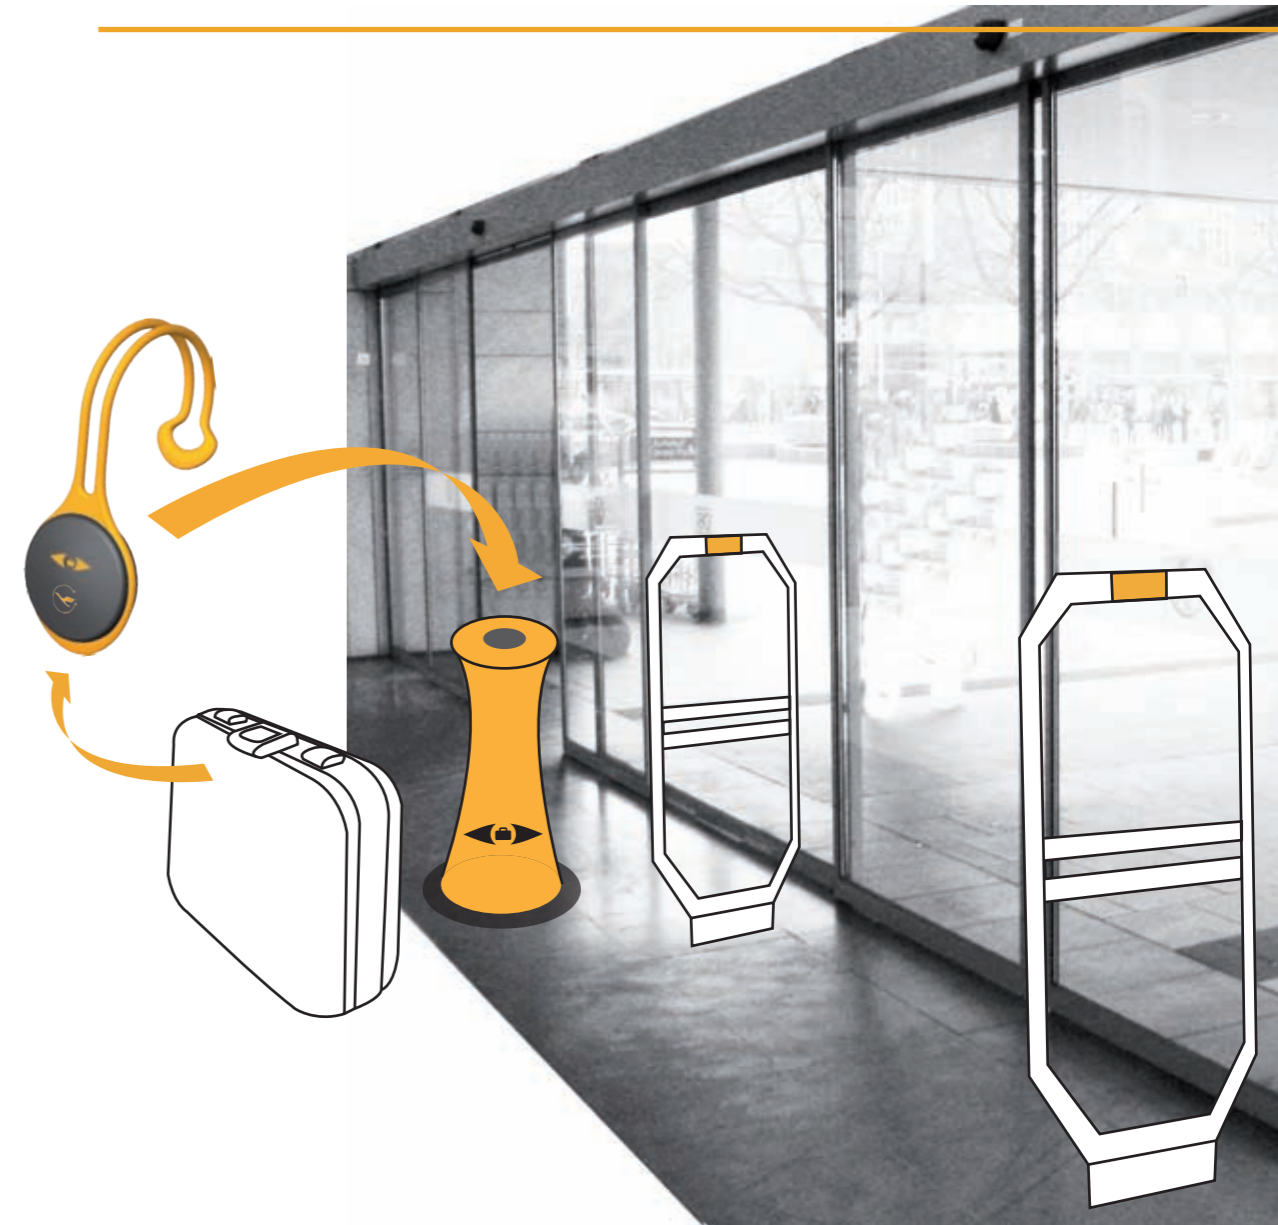

Return

Before leaving the airport, „i-trace“ is to be detached from the luggage and dropped into the provided accumulation bin to be reused.

Drive-In

This is an option for persons travelling by themselves. They can check-in their luggage on the outside of the airport-building. Afterwards they have enough time to park their car and get back to the airport without having to carry their luggage.

i-trace

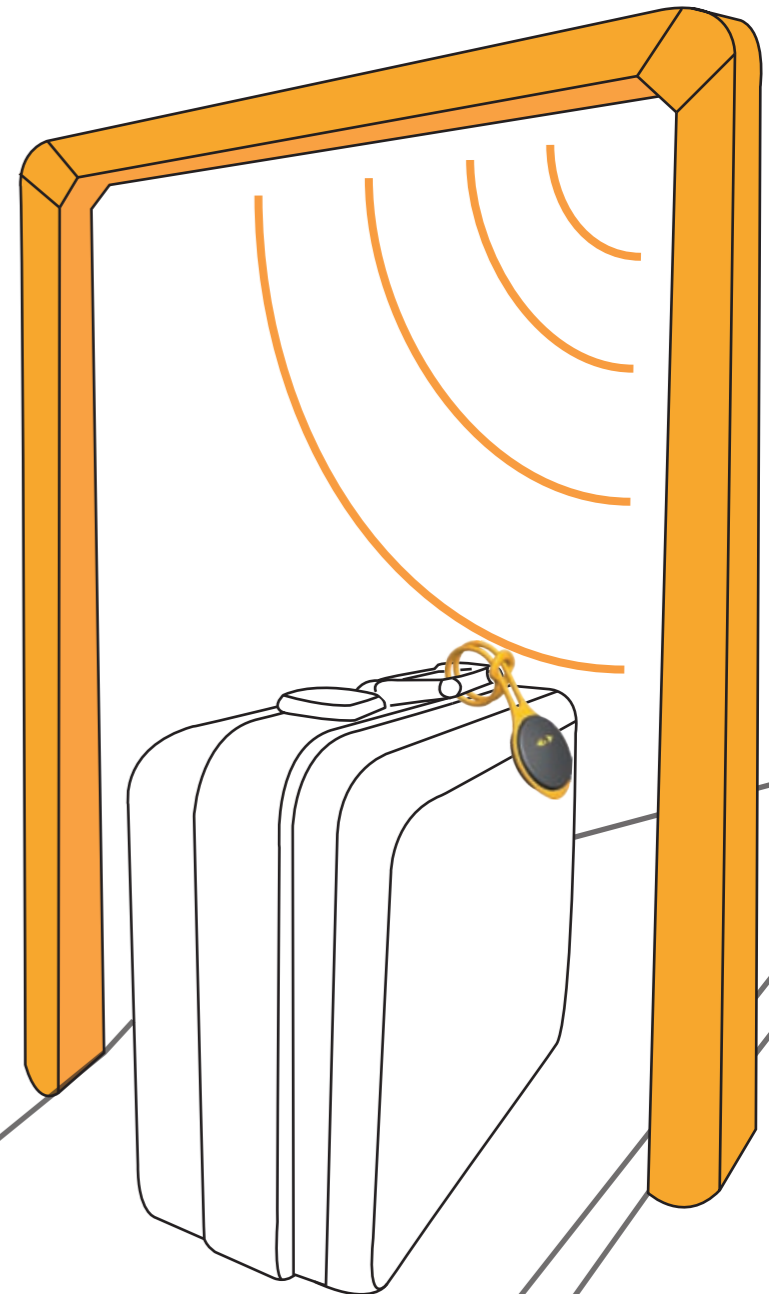

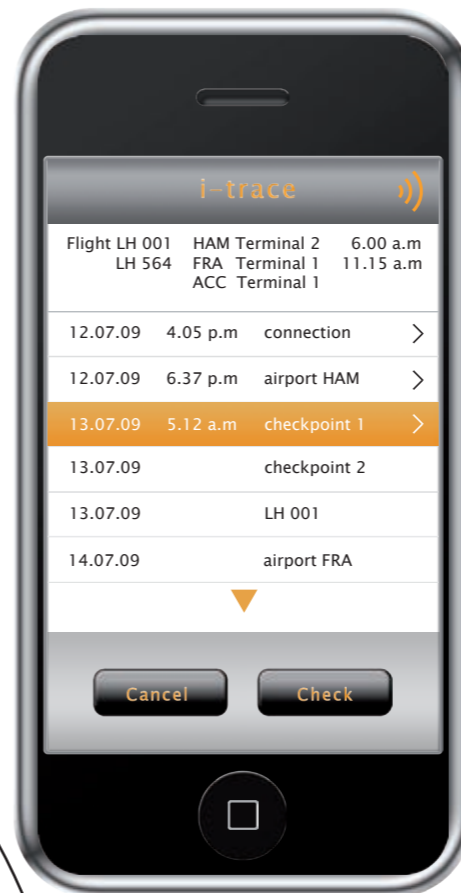

luggage handling

>>> About i-trace

The „i-trace system“ serves the individual observation of luggage. It connects to the human need for safety and control. The simple and intuitive handling of „i-trace“ attracts a wide range of people seeking for possibilities to avoid stress.

The item will be available at the check-in machines. There it will get the flight information and a code. With this code, the authorized person can check the status of the luggage item via mobile phone.

Looking at the economical aspect, it is be reasonable for an airline to install this system to gain a unique feature on the market (e.g. Lufthansa). <<<
