

# Gecko

An autonomous system of goods delivery.  
A robot able to walk on any surface with every inclination can reach the user everywhere he is.

It can runs on continuous track with an electro-adhesive system that give to the robot skills to climb walls.

VisionWorks Award CargoPacks 2020

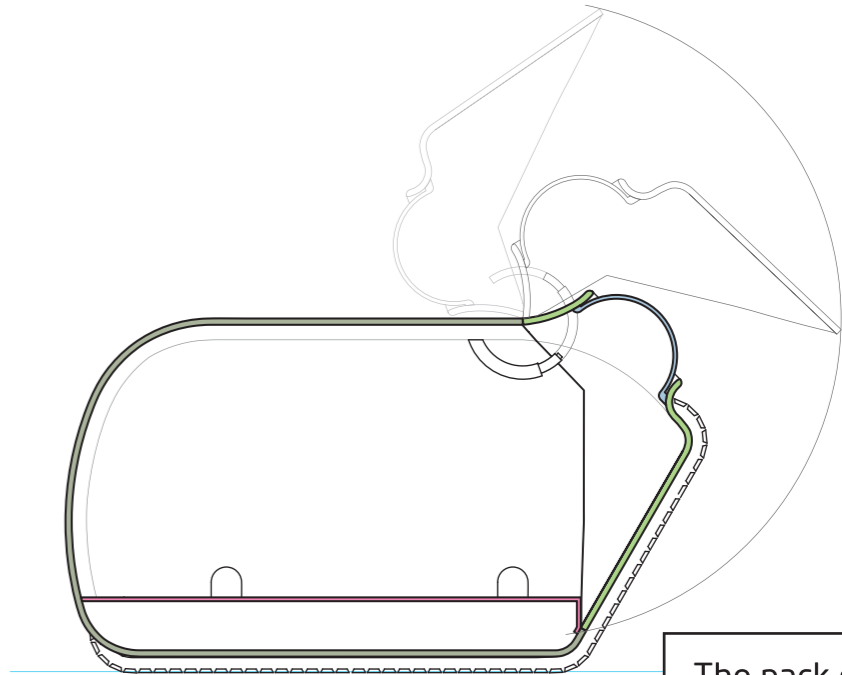

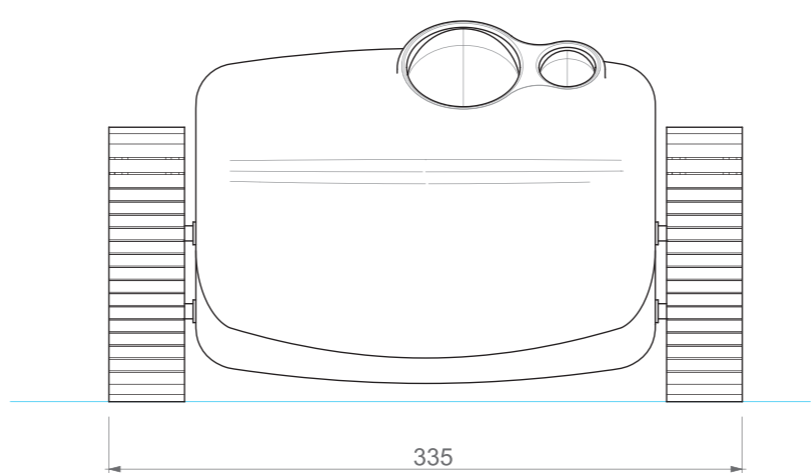

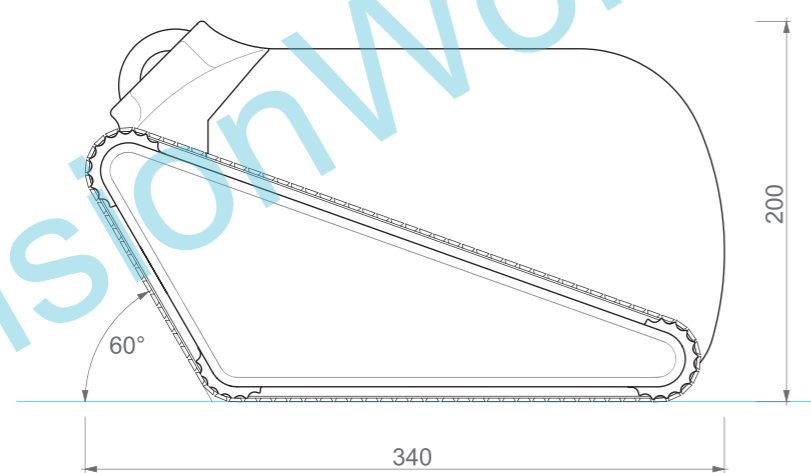

# Gecko

When the user is recognized by id-card, the robot release the pack.

We can control it with bluetooth connection and the robot can receive all information about delivery, route, identity of addressee.

The pack can be inserted inside the robot.
