you've got your box

PrintYourPack 01 IntelligentPackaging

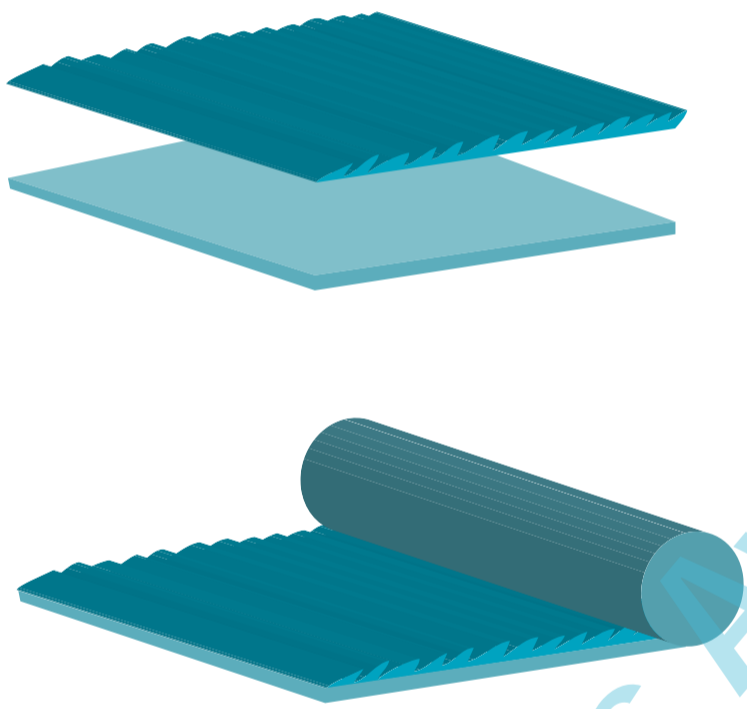

External Shape

PYP is design for YOU :

- insert sender and addressee
- put the object into the hall and then scanner analyzes the shape
- choose your favourite box
- choose your favourite texture
- follow the indication to fold the box and then pump it
- send your personal box

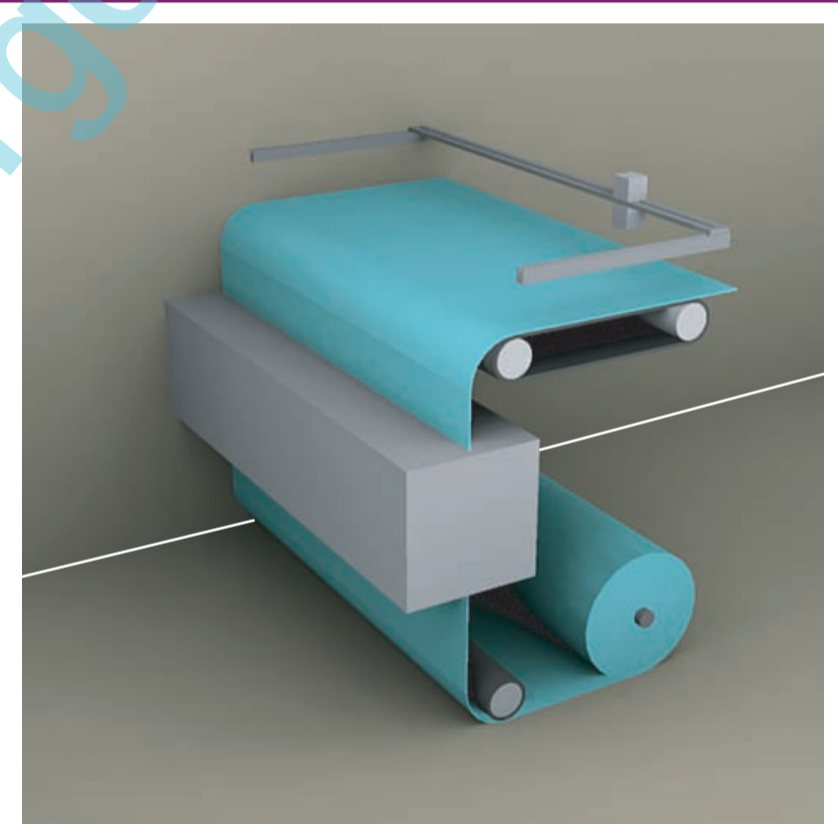

Don't worry your object is protected by the air!!

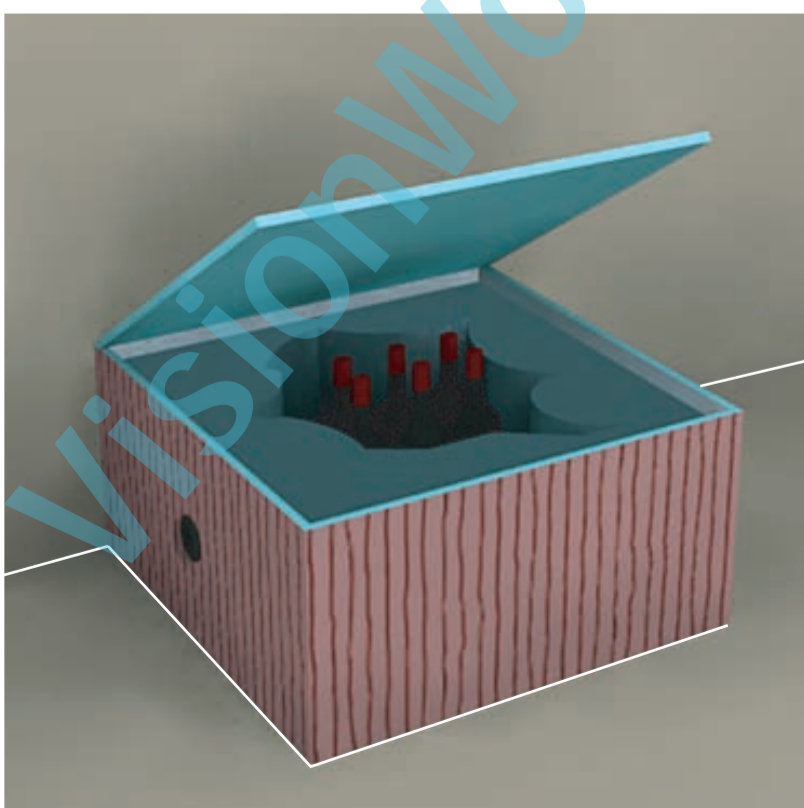

BiodegradableMaterial

- PrintYourPack is a machine that prints a costumed package with only one biodegradable material.
- PYP works in easy way:
 - the biodegradable roll (composed from 2 different layers, first that is blended on itself and the second that is semi-rigid) is loaded into the printer
 - then it 's cutted by the laser following the computer indication.

The encumbrance of PYP
132 x 88 x 170 cm

Internal Structure

Box made by PYP

The power of PYP is that everyone can choose his favourite box.

Later the box can be reused to send something else or it can be recycle : the box as a new box and the inside layer as a biodegradable bag.

Some ipotesys for the material :

- polymer developed by sugar cane
- polymer making by potatoes
